About Creativebug with CBTV

Chapter 1 - About Creativebug
How Creativebug Works
(piano music) - [Narrator] At first I offered classes to friends. I would practice, and I thought of it as if this was a dream class that I would've taken in the beginning, this is how I would've presented it. - [Narrator] I think I've always drawn and made things and taken workshops. And then eventually got to the point where I had taken so many classes, I was like, well I could teach these, and then eventually I did start teaching them. - [Narrator] If I want anything in the world, it's to be able to encourage people. I'm giving away all my secrets so you can tell exactly how I'm thinking. Nothing makes me happier than that.
